

Kalajda, A. F.; Yudenko, G. P.

Matrix methods for solving the boundary-value problem for a second-order differential equation with delayed argument. (English. Russian original) [Zbl 0777.65054](#)

J. Sov. Math. 58, No. 5, 404-407 (1992); translation from *Vychisl. Prikl. Mat.*, Kiev 58, 19-24 (1986).

See the review in [Zbl 0634.65068](#).

MSC:

[65L10](#) Numerical solution of boundary value problems involving ordinary differential equations

[34K05](#) General theory of functional-differential equations

Keywords:

Zero rank matrix algorithms; numerical differentiation; numerical- analytical methods; second-order differential equations
