

Neumann-Lara, V.

Vertex critical 4-dichromatic circulant tournaments. (English) Zbl 0876.05039
Discrete Math. 170, No. 1-3, 289-291 (1997).

Summary: An infinite family of vertex critical 4-dichromatic circulant tournaments is presented, answering a problem posed by *V. Neumann-Lara* and *J. Urrutia* [Discrete Math. 49, 83-87 (1984; Zbl 0532.05031)].

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
