

Garbaczewski, Piotr; Rzewuski, Jan

On generating functionals for antisymmetric functions and their application in quantum field theory. (English) [Zbl 0325.46071](#)

Rep. Math. Phys. 6, 431-444 (1974).

For a scan of this review see the [web version](#).

MSC:

46N99 Miscellaneous applications of functional analysis

28C20 Set functions and measures and integrals in infinite-dimensional spaces
(Wiener measure, Gaussian measure, etc.)

46L05 General theory of C^* -algebras

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
