

Simon, Barry

Classical boundary conditions as a technical tool in modern mathematical physics. (English)

Zbl 0414.35069

Adv. Math. 30, 268-281 (1978).

For a scan of this review see the [web version](#).

MSC:

35Q99 Partial differential equations of mathematical physics and other areas of application

Cited in **13** Documents

78A30 Electro- and magnetostatics

76W05 Magnetohydrodynamics and electrohydrodynamics

76E25 Stability and instability of magnetohydrodynamic and electrohydrodynamic flows

Keywords:

[problems in quantum physics](#); [Dirichlet and Neumann Green's functions](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
