

Hopcroft, John; Pansiot, Jean-Jacques

On the reachability problem for 5-dimensional vector addition systems. (English)

Zbl 0466.68048

Theor. Comput. Sci. 8, 135-159 (1979).

For a scan of this review see the [web version](#).

MSC:

68Q85 Models and methods for concurrent and distributed computing (process algebras, bisimulation, transition nets, etc.)

Cited in **43** Documents

03B25 Decidability of theories and sets of sentences

03D80 Applications of computability and recursion theory

Keywords:

constructible semilinear sets; n-dimensional vector addition system with finite state control

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
