

**Preuss, Hans-Peter**

**Perfect steady-state tracking and disturbance rejection by constant state feedback.** (English)

Zbl 0473.93058

Int. J. Control 35, 75-94 (1982).

For a scan of this review see the [web version](#).

**MSC:**

- 93D15 Stabilization of systems by feedback
- 93B25 Algebraic methods
- 93C35 Multivariable systems, multidimensional control systems
- 93C05 Linear systems in control theory
- 93C99 Model systems in control theory
- 15A09 Theory of matrix inversion and generalized inverses

Cited in 3 Documents

**Keywords:**

steady-state tracking; disturbance rejection; constant state feedback

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
