

Rao, T. J.

A note on unbiasedness in ratio estimation. (English) Zbl 0475.62007
J. Stat. Plann. Inference 5, 335-340 (1981).

For a scan of this review see the [web version](#).

MSC:

62D05 Sampling theory, sample surveys

Cited in 5 Documents

Keywords:

reducing bias; generalized jackknife; population mean

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
