

Zadeh, L. A.

Fuzzy sets as a basis for a theory of possibility. (English) Zbl 0377.04002

Fuzzy Sets Syst. 1, 3-28 (1978).

For a scan of this review see the [web version](#).

MSC:

[03E72](#) Theory of fuzzy sets, etc.

[03A05](#) Philosophical and critical aspects of logic and foundations

[94D05](#) Fuzzy sets and logic (in connection with information, communication, or circuits theory)

Cited in **22** Reviews
Cited in **1473** Documents

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
