

Wolkowicz, Henry

Method of reduction in convex programming. (English) Zbl 0494.90059
J. Optimization Theory Appl. 40, 349-378 (1983).

For a scan of this review see the [web version](#).

MSC:

90C25 Convex programming
65K05 Numerical mathematical programming methods

Cited in 3 Documents

Keywords:

faithfully convex not necessarily differentiable constraints; Slater's condition; stability; subdifferentials; cones of directions of constancy; equality set of constraints; solution algorithms

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
