

**Lehman, Steven L.; Stark, Lawrence W.**

**Three algorithms for interpreting models consisting of ordinary differential equations: Sensitivity coefficients, sensitivity functions, global optimization.** (English) Zbl 0504.93022  
*Math. Biosci.* 62, 107-122 (1982).

For a scan of this review see the [web version](#).

**MSC:**

- 93B35 Sensitivity (robustness)
- 92C50 Medical applications (general)
- 93C15 Control/observation systems governed by ordinary differential equations
- 93B40 Computational methods in systems theory (MSC2010)
- 93C10 Nonlinear systems in control theory
- 92Cxx Physiological, cellular and medical topics

Cited in **2** Documents

**Keywords:**

[parameter sensitivity analysis](#); [sensitivity functions](#); [unconstrained global optimization algorithm](#); [human eye movements](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
