

Epstein, Larry G.

Stationary cardinal utility and optimal growth under uncertainty. (English) Zbl 0517.90007
J. Econ. Theory 31, 133-152 (1983).

For a scan of this review see the [web version](#).

MSC:

91B16 Utility theory
91B62 Economic growth models

Cited in **1** Review
Cited in **35** Documents

Keywords:

multi-period planning under uncertainty; non-additive utility indices; infinite consumption streams; optimal growth under uncertainty; existence and stability of a stochastic steady state

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
