

**Spalart, Philippe R.**

**Direct simulation of a turbulent boundary layer up to  $R_\theta = 1410$ .** (English) Zbl 0641.76050  
J. Fluid Mech. 187, 61-98 (1988).

**MSC:**

**76F10** Shear flows and turbulence  
**76M99** Basic methods in fluid mechanics

Cited in **1** Review  
Cited in **247** Documents

**Keywords:**

turbulent boundary layer; flat plate; three-dimensional time-dependent Navier-Stokes equations; spectral method; multiple-scale procedure; turbulence-model testing

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
