

Stan, I.

On a nonlinear complex interpolation result for n Banach spaces. (English) Zbl 0655.46057
Semin. Oper. Liniari Anal. Armonică, Univ. Timișoara 10, 5-7 (1985).

Our result generalizes the complex interpolation method introduced in [*J. Bergh*, Lect. Notes Math. 1070, 45-47 (1984; [Zbl 0545.46053](#))] and [*A. Favini*, Rend. Sem. Mat. Univ. Padova 47, 243-298 (1972; [Zbl 0248.46032](#))]. For $n = 2$ this result is given in [the author, *ibid.* 1 (1982)].
