

Canal, Richard

Complexite de la reduction en logique combinatoire. (French) Zbl 0432.03012
RAIRO, Inf. Théor. 12, 339-367 (1978).

For a scan of this review see the [web version](#).

MSC:

03B40 Combinatory logic and lambda calculus

Cited in **2** Documents

Keywords:

weak combinatory logic; reduction complexity; rewriting process; reduction of applicative combinations of proper combinators; upper and lower bounds on the length of the reduction; normal form

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
