

**Campanino, M.; Epstein, H.**

**On the existence of Feigenbaum's fixed point.** (English) Zbl 0474.58013

*Commun. Math. Phys.* 79, 261-302 (1981).

For a scan of this review see the [web version](#).

**MSC:**

**37G99** Local and nonlocal bifurcation theory for dynamical systems

**47H10** Fixed-point theorems

Cited in **3** Reviews  
Cited in **33** Documents

**Keywords:**

self maps of the interval; Feigenbaum conjecture; one-parameter families of one-dimensional dynamical systems

**Full Text:** [DOI](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
