

Czogala, Ernest; Pedrycz, Witold

Control problems in fuzzy systems. (English) Zbl 0506.93039

Fuzzy Sets Syst. 7, 257-273 (1982).

For a scan of this review see the [web version](#).

MSC:

- 93C30 Control/observation systems governed by functional relations other than differential equations (such as hybrid and switching systems)
- 03E72 Theory of fuzzy sets, etc.
- 94D05 Fuzzy sets and logic (in connection with information, communication, or circuits theory)
- 03B52 Fuzzy logic; logic of vagueness
- 93B30 System identification
- 93D15 Stabilization of systems by feedback
- 93B40 Computational methods in systems theory (MSC2010)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
