

Levin, Ori; Davidsson, E. Niklas; Henningson, Dan S.

Transition thresholds in the asymptotic suction boundary layer. (English) Zbl 1188.76078
Phys. Fluids 17, No. 11, Paper No. 114104, 11 p. (2005).

Editorial remark: No review copy delivered.

MSC:

76-XX Fluid mechanics

Cited in 4 Documents

Keywords:

boundary layer turbulence; laminar to turbulent transitions; flow simulation; vortices; random noise; flow instability; waves

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
