Mikhailov, A. P.; Petrov, A. P.
Behavioral hypotheses and mathematical modeling in humanitarian sciences. (Russian. English summary) Zbl 1249.91026
Mat. Model. 23, No. 6, 18-32 (2011).

Some problems of social (economical, political) processes modeling are discussed. It is mentioned that sociology, psychology and other humanitarian sciences should be used for formulation of hypotheses describing behavior of individuals and social groups.
