Al-Khôwârizmî and his algebraic treatise. (Chinese)  

In this note, the author makes use of Karpinski’s work: Robert of Chester’s Latin translation of the algebra of al-Khôwârizmî (New York, 1915), in order to explain al-Khôwârizmî’s contribution to algebra, and to expound al-Khôwârizmî’s influence on the development of European mathematics. His algebraic treatise “ilm al-jabr wa’l muqabalah” was written about 820 A. D.
