GRChombo: numerical relativity with adaptive mesh refinement. (English) Zbl 1331.83003

Classical Quantum Gravity 32, No. 24, Article ID 245011, 34 p. (2015).

MSC:

83–08 Computational methods for problems pertaining to relativity and gravitational theory

Cited in **2** Documents

83C05 Einstein's equations (general structure, canonical formalism, Cauchy problems)

Keywords:

numerical; general relativity; adaptive mesh

Software:

AHFinderDirect; Cactus; Carpet; Chombo; Einstein Toolkit; GRChombo

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
