

**Iemhoff, Rosalie**

**On rules.** (English) Zbl 1336.03037

J. Philos. Log. 44, No. 6, 697-711 (2015).

Summary: This paper contains a brief overview of the area of admissible rules with an emphasis on results about intermediate and modal propositional logics. No proofs are given but many references to the literature are provided.

**MSC:**

**03B55** Intermediate logics

**03B45** Modal logic (including the logic of norms)

Cited in **5** Documents

**Keywords:**

admissible rules; modal logic; intermediate logic; consequence relations
