

Karlsen, K. H.; Towers, J. D.

Convergence of a Godunov scheme for conservation laws with a discontinuous flux lacking the crossing condition. (English) [Zbl 1380.65158](#)

J. Hyperbolic Differ. Equ. 14, No. 4, 671-701 (2017).

MSC:

65M06 Finite difference methods for initial value and initial-boundary value problems involving PDEs
35L65 Hyperbolic conservation laws

Cited in **1** Review
Cited in **7** Documents

Keywords:

conservation law; discontinuous flux; entropy solution; vanishing viscosity; adapted entropy; uniqueness; convergence; finite difference scheme; Godunov scheme; Γ -condition

Full Text: [DOI](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
