**Characterization of cycle obstruction sets for improper coloring planar graphs.** (English)

Zbl 1388.05061

SIAM J. Discrete Math. 32, No. 2, 1209-1228 (2018).

**MSC:**

05C15 Coloring of graphs and hypergraphs

05C10 Planar graphs; geometric and topological aspects of graph theory

Cited in 1 Document

**Keywords:**

graph coloring; improper coloring; defective coloring; planar graphs; obstruction sets

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
