Space-efficient indexes for forbidden extension queries. (English) Zbl 06993619

J. Discrete Algorithms 50, 23-35 (2018).

MSC:

68W Algorithms in computer science
05C85 Graph algorithms (graph-theoretic aspects)

Keywords:

suffix trees; data structures; string algorithms; top-k; document retrieval

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
