

Gil Rodríguez, R.; Vazquez-Corral, J.; Bertalmío, M.

Issues with common assumptions about the camera pipeline and their impact in HDR imaging from multiple exposures. (English) Zbl 1434.68627

SIAM J. Imaging Sci. 12, No. 4, 1627-1642 (2019).

MSC:

- 68U10 Computing methodologies for image processing
- 62H35 Image analysis in multivariate analysis
- 65D18 Numerical aspects of computer graphics, image analysis, and computational geometry
- 94A08 Image processing (compression, reconstruction, etc.) in information and communication theory

Keywords:

high dynamic range; multiexposure sequence; projective transformation; color stabilization

Full Text: [DOI](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
