

**Mironov, Sergey; Rubakov, Valery; Volkova, Victoria**

**More about stable wormholes in beyond Horndeski theory.** (English) Zbl 1477.83078  
Classical Quantum Gravity 36, No. 13, Article ID 135008, 25 p. (2019).

**MSC:**

- 83D05 Relativistic gravitational theories other than Einstein's, including asymmetric field theories
- 83C20 Classes of solutions; algebraically special solutions, metrics with symmetries for problems in general relativity and gravitational theory
- 76E20 Stability and instability of geophysical and astrophysical flows

**Keywords:**

wormhole; stability; Horndeski theory; modified gravity

**Full Text:** [DOI](#) [arXiv](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
