

Francfort, Jérémie; Cusin, Giulia; Durrer, Ruth

Image rotation from lensing. (English) Zbl 1480.83059

Classical Quantum Gravity 38, No. 24, Article ID 245008, 29 p. (2021).

MSC:

- 83C50 Electromagnetic fields in general relativity and gravitational theory
- 78A45 Diffraction, scattering
- 85A25 Radiative transfer in astronomy and astrophysics
- 85A15 Galactic and stellar structure
- 85A05 Galactic and stellar dynamics
- 53C22 Geodesics in global differential geometry

Keywords:

weak lensing; image rotation; general relativity; polarisation; shear; galaxies

Full Text: [DOI](#) [arXiv](#)

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
