Einstein, Albert

[See the review above, Zbl 0795.01035.]

Similar to volume 1 and 2 this volume only accompanies volume 3 of the Collected Papers, it should not be used without it. There is an English translation of all the documents Nos. 1-27. But, the appendices, that also means Einstein’s Scratch Notebook, the cited literature and the indices are not included. It is not a literary translation but it should “provide a careful accurate translation that is as close to the German original as possible” (Preface).
