

Perfil'eva, I. G.

Applications of the theory of fuzzy sets. (English. Russian original) Zbl 0825.94321

J. Sov. Math. 58, No. 2, 148-194 (1992); translation from *Itogi Nauki Tekh.*, Ser. Teor. Veroyatn., Mat. Stat., Teor. Kibern. 29, 83-151 (1990).

MSC:

- 94D05 Fuzzy sets and logic (in connection with information, communication, or circuits theory)
- 93C42 Fuzzy control/observation systems
- 68T35 Theory of languages and software systems (knowledge-based systems, expert systems, etc.) for artificial intelligence
- 03E72 Theory of fuzzy sets, etc.
- 03B52 Fuzzy logic; logic of vagueness

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
