RSA ciphers with Maple. (English) Zbl 0997.94015

Summary: Although other programming languages are equally good and can be used to handle RSA cipher, Maple provides a more friendly environment in computational works. This paper demonstrates how nicely an RSA cipher system works with Maple.

MSC: 94A60 Cryptography 68W01 General topics in the theory of algorithms

Keywords: RSA cipher; Maple

Software:
Maple
