Yener, Aylin; Yates, Roy D.; Ulukus, Sennur
Interference management for CDMA systems through power control, multiuser detection, and beamforming. (English) Zbl 1013.94501

MSC:
94A05 Communication theory
94A13 Detection theory in information and communication theory

Keywords:
code-division multiple access (CDMA); interference suppression; MMSE receivers; multiuser detection; power control; receiver beamforming
