

Soubies, Emmanuel; Blanc-Féraud, Laure; Aubert, Gilles

A continuous exact ℓ_0 penalty (CEL0) for least squares regularized problem. (English)

Zbl 1325.65086

SIAM J. Imaging Sci. 8, No. 3, 1607-1639 (2015).

MSC:

65K05 Numerical mathematical programming methods
90C26 Nonconvex programming, global optimization
90C55 Methods of successive quadratic programming type

Cited in **1** Review
Cited in **13** Documents

Keywords:

inverse problems; ℓ_0 regularization; sparse modeling; underdetermined linear systems; global minimizers; local minimizers; minimizer equivalence; continuous exact ℓ_0 penalty; nonconvex nonsmooth penalty; least squares problem; nonconvex algorithm; convergence

Software:

PDCO

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
