

Ford, Lester R.

Automorphic functions. 2nd edition. (English) Zbl 1364.30001
New York, NY: Chelsea Publishing. 333 p. (1951).

See the review of the first edition in [[JFM 55.0810.04](#)].

MSC:

- [30-01](#) Introductory exposition (textbooks, tutorial papers, etc.) pertaining to functions of a complex variable
- [01A75](#) Collected or selected works; reprintings or translations of classics
- [11-01](#) Introductory exposition (textbooks, tutorial papers, etc.) pertaining to number theory
- [11Fxx](#) Discontinuous groups and automorphic forms
- [30C55](#) General theory of univalent and multivalent functions of one complex variable
- [30C80](#) Maximum principle, Schwarz's lemma, Lindelöf principle, analogues and generalizations; subordination
- [30Fxx](#) Riemann surfaces
