Durán, Antonio J.

Einstein and Don Quixote. (Spanish) [Zbl 1375.01038]

Most of the contents of this paper are to be found in the author’s book [El universo sobre nosotros. Un periplo fascinante desde el cielo de don Quijote al cosmos de Einstein (Spanish). Barcelona: Crítica (2015)].

As such, as guessed by the reviewer, the author wishes to take the attention of the readers/members of the Spanish Mathematical Society about the contents and life of Albert Einstein, his contemporaries, and (perhaps) also obstructions he has to encounter. The paper contains a lot of information, suited for people with Spanish as their mother tongue. Of course, a lot has been said already about the life and work of Albert Einstein, in Spanish speaking areas of the world as well, in about hundred years. Anyway, a good and beautiful informative paper.

Reviewer: Robert W. van der Waall (Amsterdam)
