Old-age provision: past, present, future. (English) Zbl 1394.91007

Eur. Actuar. J. 6, No. 2, 287-306 (2016).

Summary: This is a summary of the main topics and findings from the Swiss Risk and Insurance Forum 2015. That event gathered experts from academia, insurance industry, regulatory bodies, and consulting companies to discuss the past and current developments and necessary next steps for dealing with old-age provision. Topics include the pension funding gap, demographic and societal challenges, the valuation of pension liabilities, economic and regulatory capital models, and the role of financial markets.

MSC:

- 91-06 Proceedings, conferences, collections, etc. pertaining to game theory, economics, and finance Cited in 4 Documents
- 91B30 Risk theory, insurance (MSC2010)
- 91D20 Mathematical geography and demography
- 91G99 Actuarial science and mathematical finance

Keywords:

pension funding gap; demographic and societal challenges; valuation of pension liabilities; economic and regulatory capital models; role of financial markets
