

Masa, Angel D. D.; de Oliveira, Enesson S.; Zanchin, Vilson T.

New regular black hole solutions and other electrically charged compact objects with a de Sitter core and a matter layer. (English) [Zbl 1430.83050](#)

Int. J. Mod. Phys. D 27, No. 11, Article ID 1843015, 31 p. (2018).

MSC:

83C57 Black holes

83C20 Classes of solutions; algebraically special solutions, metrics with symmetries for problems in general relativity and gravitational theory

Keywords:

Einstein-Maxwell theory; regular black holes; compact objects

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
